PROFILE

Results-driven Full-Stack Developer with 4+ years of expertise in Django and React, building scalable web applications that streamline environmental project workflows and enhance data-driven decision-making for government infrastructure teams.

WORK EXPERIENCE

FULL-STACK SOFTWARE DEVELOPPER

Environmental office of Ministry of infrastructure (2022-Present)

- **Legacy System Migration:** Led migration of 150+ environmental projects from Google Drive/Trello to a PostgreSQL database, eliminating data-loss risks and cutting search time by 30%.
- **Custom Project Management System:** Built a Django-React platform with role-based permissions and automated notifications, replacing Trello and reducing workflow dependencies by 50%.
- **Geospatial Tools Development:** Engineered a React/OpenLayers map viewer (integrated with GeoServer) for terrain analysis and layer intersections, currently in active development.

TECHNICAL SKILLS

(2022 - Present)

- **Backend:** Django 5, Django REST Framework, Django REST Framework Simple JWT, PostgreSQL/PostGIS, Python 3.12+
- **Frontend:** React 18, TypeScript, OpenLayers, Flowbite-React, Redux/Zustand, Zod React Hook Forms, React Router, Vite
- **DevOps & GIS:** Docker (Compose), GeoServer, Metabase, pgAdmin, Rclone, CI/CD pipelines
- **Methodologies:** Agile/Scrum, Cross-functional collaboration with non-technical stakeholders
- **Other:** Git
